

# PELLET HEATER INSERT IP 78/58

*Continuous fire technology and practicality.*

*The IP inserts allows the traditional fireplace to be transformed by exploiting the outstanding convenience of a practical fuel such as the pellet without forgoing the pleasure of seeing a fire. High efficiency, long burn time, programmable automatic switching on and off are all features of Piazzetta pellet-burning inserts, also suitable for new fireplaces.*

*Pellet heating is up to 70% more efficient than traditional wood stoves and has significantly lower emissions levels. It's comfort with a conscience.*

## SIMPLE TO INSTALL

Installation times and costs are reduced.

The standard supply of a plate for fixing to the existing flue makes installation easier. The optional height-adjustable legs kit makes the inserts also suitable for new fireplace.

## TECHNICAL DATA

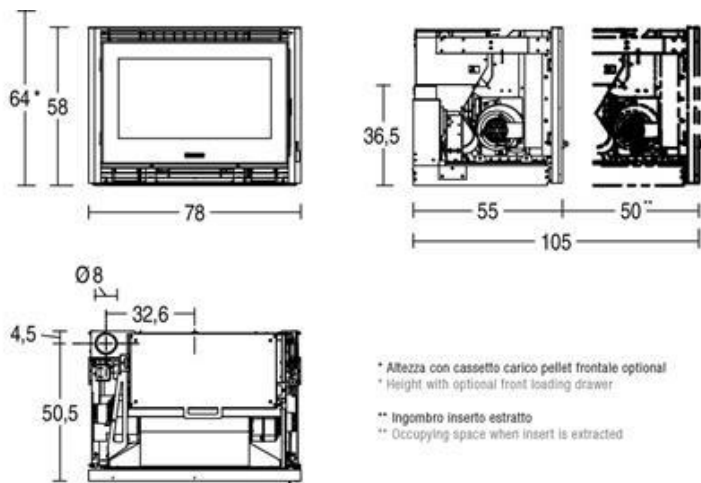

• Firebox heat output kW	9
• Nominal heat output (min-max) kW	3.2 – 9.0
• Room heating capacity (min-max) m <sup>3</sup>	150 - 260
• Nominal thermal efficiency %	85.1
• Nominal consumption (min – max)	0.9 – 2.3
• Electric power consumption (W)	130
• Standard flue outlet Ø cm	8
• Hopper Capacity kg	13
• Dimensions W x D x H cm	78 x 55 x 58
• Stove weight kg	120
• Fresh air intake Ø cm <sup>2</sup>	100
• Power settings	5

## DETAIL

## WHAT YOU NEED TO KNOW

*Pellet heaters like other heaters & stoves need to be installed by a licenced plumber or trained installer. Regular maintenance and cleaning will enhance the performance and life of your heater. We recommend 'RedHot' Pellets for optimum performance.*

## GENERAL TECHNICAL CHARACTERISTICS

**Structure:** enamelled steel with closed firebox on sliding tracks

**Firebox:** in cast iron

**Brazier:** in steel

**Opening:** cast iron door with self-cleaning ceramic glass resistant up to 750°C

**Door handle:** hide away and detachable

**Functions:** LCD remote control and Multicomfort settings, additional control unit

**Timer/thermostat:** standard, allows split times for daily, weekly and weekend programs

**Fuel:** pellet

**Heating:** forced ventilation through Multifuoco System® with Dual Power, radiant and natural convection

**Optional:** Additional Hopper Pellet Loading Kit.

## MULTIFUOCO SYSTEM

Perfect warmth from the floor to the ceiling.

Multifuoco System® is a standard fitting on all models so that the heat produced is distributed evenly throughout the room and hot air can also be ducted into adjacent rooms or upstairs.

## DUAL POWER SYSTEM

Two independent fans.

To optimize hot air flow in adjoining rooms, the pellet fireboxes are fitted with a double fan. The capacity of the two fans can be control separately to create individual zones

## SLIDING TRACKS

Safe and easy use

Solid and reinforced tracks make pellet loading and maintenance trouble free.pection

## MULTICOMFORT

Saving in all comfort.

The LCD remote control with Multicomfort function gives you control over the temperature in the room where the insert is installed or in adjacent rooms. The remote control also acts as a timer thermostat offering weekly, daily and weekend programming options.

## TOP PELLET LOADING TRAY KIT

Additional system for loading pellets.

An optional box tray can be fitted in addition to the standard hopper for simple and practical pellet loading even with the insert in operation.

## ADDITIONAL PELLET HOPPER AND LOADING KIT

Easy pellet loading and longer burn time.

An optional kit for front or right/left side loading is also available, with the insert in operation. Its shape increases the capacity of the hopper and therefore lengthens the burn time.

## PELLET LEVEL SENSOR

Practical management of the fireplace insert.

The amount of pellets inside the hopper is constantly monitored by a sensor, which sends a minimum level warning to the remote control.

## CAST IRON FIREBOX

High performance and long life.

The cast iron firebox ensures a high heat exchange and therefore greater efficiency. Its considerable thickness guarantees that the insert is structurally very robust and will have a long life.

## SAFETY DEVICE

Automatic interlock system.

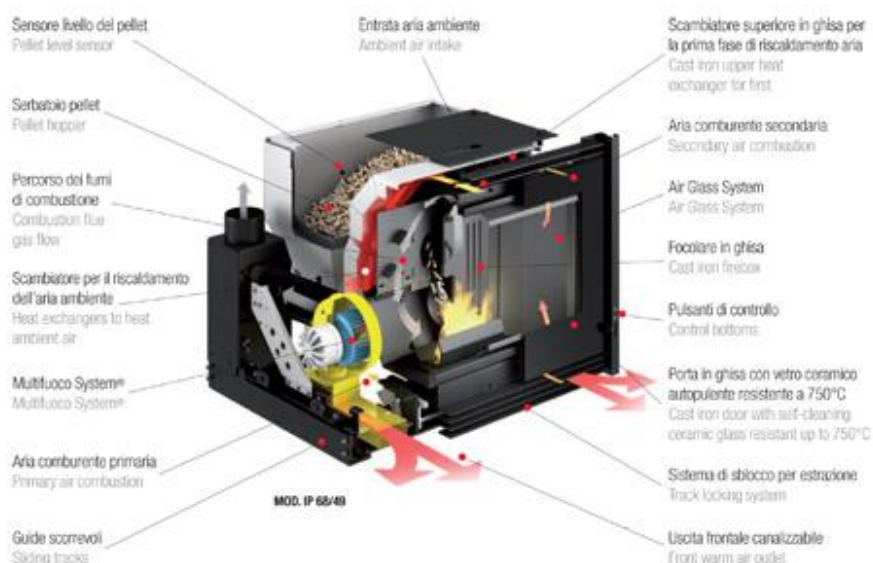

Piazzetta has developed an automatic safety interlock system for the insert in case the door is accidentally opened.

## MANUAL LOCKING SYSTEM

Safe and easy extraction.

The manual locking extraction system on the insert increases the safety while maintaining the operations simple.
